

General Information Test

1. For most RV technicians the two kinds of coax they will encounter are RG-59 and RG-6. Which one should be used from the satellite antenna to the receiver?
 - a. RG-59
 - b. RG-6
2. For automatic domed systems, the “Check switch” test must be performed during the first ____ minutes after a successful search and the dish has quit moving.
 - a. 10
 - b. 5
 - c. 6
 - d. 12
3. The “Check Switch” test must be performed how often?
 - a. Every time receiver is powered on.
 - b. Every time the RV loses power.
 - c. If an SW-42 switch is installed.
 - d. On initial installation or if you have changed it for home use.
4. All Winegard domed satellite systems have switches that need to be set for ____.
 - a. True North
 - b. Satellite service provider and mounting option if applicable
 - c. The Southern sky
 - d. Number of TV’s used
5. The main satellites for DIRECTV are _____. These are the satellites domed systems can toggle between when set for DIRECTV.
 - a. 119, 110
 - b. 101, 110
 - c. 101, 119
 - d. 119, 101, 110
6. The main satellites for DISH Network are _____. These are the satellite domed systems can toggle between when set for DISH Network.
 - a. 119, 110.
 - b. 101, 110.
 - c. 119, 101.
 - d. 119, 101, 110

7. The best place to get power for a satellite system is?
 - a. The converter.
 - b. The inverter.
 - c. The battery.
 - d. The lighting circuit.

8. With an in-motion system, the unit will _____.
 - a. Enter sleep mode immediately once stationary.
 - b. Track continuously while stationary.
 - c. Not work while stationary, it is not designed for this.
 - d. Enter sleep mode after being stationary for 6 minutes.

9. It is possible for a customer to lose some of their programming if they haven't used their system in a while. The proper way to fix this is to _____.
 - a. Call the service provider to have the receiver re-activated.
 - b. Buy a new receiver.
 - c. Switch to a different service provider.
 - d. All of the above.

10. An SW42/SW64 switch is _____.
 - a. An accessory that must be purchased separately.
 - b. A switch that allows domed systems to toggle with DISH Network.
 - c. The green switch used for powering on the system.
 - d. The rotary splint in the dome.
