Why Winegard?

*Because Knowledge, Experience
and a Commitment to Excellence Matter*

Market Knowledge Born Of A Rich History and Cutting Edge Thinking

Since 1954, Winegard has been an innovative leader in antenna design technology and manufacturing techniques, backed by outstanding service after the sale. We understand the antenna market and deliver quality products with outstanding performance, on time and on budget. This means faster access to your markets and reduced returns.

Antenna Design and Testing

Covering every phase of design, testing, manufacturing, packaging, and processing. Built in the US in our 250,000 sq. ft. facility, we still do almost everything in-house - Roll steel - Injection molding - Small and large press forms - E coat and Powder coat. And we build electronic components and circuits, using our surface mount fully automated (pick and place) technology virtually eliminates the expense and poor quality associated with "hand placed electronic components".

Packaging and Shipping

Customize packaging with graphics to your requirements and market needs - Attention to "Product Survivability" through drop testing and certified ISTA design. And our central location in the heartland allows us to ship anywhere in the US quickly.

Service After The Sale

Customer Service Reps - With a true commitment to service. Service and Repair Reps - Providing technical support with bench-test systems to simulate problems in the field. Engineering Technical Support Reps - to deal with advanced engineering issues.

Unique HDTV and Mobile Satellite Knowledge

Winegard, through extensive testing, understands the complexities and physical requirements of both Digital TV and Mobile Satellite television solutions and reception.

Mobile Television Reception Products: RV Tracking, and Marine applications. Satellite systems ranging from manual crank-up models to automatic satellite tracking systems with GPS/DVB. Off-air antennas including bi-directional and omni-directional VHF/UHF/FM antennas. Ground Antenna Mounts and Accessories.

Off-Air Antennas: From DC to 5.8 gig AM/FM/VHF/UHF Antenna Systems, Distribution and Pre-amplifiers, Power Supplies and Accessories.

Telemetry: Medical and Data Antenna Systems, Distribution Amplifiers, Power Supplies and Accessories.

Winegard - Ready To Share Our Knowledge and Experience With You.
